

PRECOCARE organic feed additive

Peat and sapropel concentrate

DESCRIPTION

Concentrate with a high content of humic and fulvic acids for productive and non-productive animals and poultry to ensure clean breeding. The humic feed additive contains organic compounds such as lake sapropel, and low-moor peat.

PRECOCARE use brings the following advantages:

1. Accelerates the growth of farm animals & poultry, reducing morbidity and mortality.
2. Reduces the release of ammonia by the gastrointestinal biome of animals and poultry.
3. Increases in the live weight of newborn animals and poultry.
4. Has an adsorbing effect in the digestive tract of animals.

COMPOUND	VALUE
Dry matter	3,5 %
Combustible substances	2,4 %
Humic substances	3,5 %
Nitrogen as N, min.	0,3 %
Potassium as K ₂ O, min.	0,2 %
Calcium as CaO, min.	0,1 %
pH	7,3-9,5

Scope of use and method of use:

Preparation intended for direct application for cows, goats, calves, or chickens. Below indicated daily dosages per 1 kg of live weight.

1. Milking cows: 0.5 ml with feed, silage for 15 days, pause 30 days.
2. Goats: 0.5 ml with feed, silage for 15 days, pause 10 days.
3. Calves 2-6 months: 0.5 ml with feed for 15 days, pause 10 days.
4. Rabbits: 0.4 ml with feed for 15 days, pause 10 days.
5. Laying hens: 2 L of feed additive per 1000 L of drinking water for 30 days, pause 7 days.
6. Broiler chickens: 2 L of feed additive per 1000 L of drinking water upon slaughtering.

More details on the application for each individual type of animal, see www.precoinvest.cz

SHAKE IT BEFORE USE !

Safety and health protection at work:

Observe basic hygienic rules and use safety gloves at work. Wash your hands with water and soap after work.

First aid:

In case of contact with eyes, rinse immediately and thoroughly with clean water.

In case of contact with skin, rinse with plenty of water immediately and then wash with water and soap.

In case of accidental ingestion, drink 0,5 l of water immediately. In severe cases, if swallowed or in contact with eyes, always seek medical aid.

Storage conditions

Store in dry and dark place at temperature 0°C to 40°C.

Package volume: 5 l

Shelf life: 36 months from date of manufacture;
12 months after opening

Date of manufacture:
