PRECOGROW organic plant & soil concentrate

Peat and spropel concentrate

Plant and soil fertilizer

DESCRIPTION

Concentrate with a high content of humic and fulvic acids intended for plant growth stimulation and soil recovery. PRECOGROW contains organic compounds such as lake spropel, and low-moor peat.

PRECOGROW use brings the following advantages:

1. Ensures rapid rooting, growth, development of planted trees, shrubs, other plants.
2. Ensures increase in the plants' biological activity.
3. Content of humic substances increases seed germination, rich root system of plants, and therethrough improves the yield.
4. Improves the soil reaction and increases the content of organic matter.
5. Improves the soil physical properties.

Scope of use and method of use:

Preparation intended for direct application into the soil, for plant seed, roots soaking before planting or seeding

1. Application into soil after harvesting together with preparations for degrading the cellulose/nitrogen fertilizer solution 1:30. Concentrate consumption - 2,0 l/1 ha.
2. Soil preparation for seedlings: solution 1:20. Concentrate consumption - 1 l per 20 l of water and mix evenly with 100 kg of soil.
3. Seed treatment: solution 1:10 to 1:20. Concentrate consumption - 0,2 l/1 t of seed, it is requiring the seed drying before the seeding.
4. Seedlings roots soaking: solution 1:20, allow 3-5 hours to soak.
5. Root watering: solution 1:100, watering once every 2 weeks. Concentrate consumption - 2,0 l/1 ha; 80 to 100 ml per plant.
6. Application on leaves: solution 1:200, watering once a month. Concentrate consumption - 1,0 l/1 ha.

More details on application for individual crops according to soil condition see on www.precoinvest.cz

SHAKE IT BEFORE USE !

Use the water solution for preparation only. Can be used together with other fertilizers or plant protection preparations.

Safety and health protection at work:

Observe basic hygienic rules and use safety gloves at work. Wash your hands with water and soap after work.

First aid:

In case of contact with eyes, rinse immediately and thoroughly with clean water.

In case of contact with skin, rinse with plenty of water immediately and then wash with water and soap.

In case of accidental ingestion, drink 0.5 l of water immediately. In severe cases, if swallowed or in contact with eyes, always seek medical aid.

Storage conditions

Store in dry and dark place at temperature 0°C to 40°C.

Package volume: 5 l

Shelf life: 36 months from date of manufacture;

12 months after opening

Date of manufacture:
